The screenshot shows the Mendeley website interface. At the top, there's a navigation bar with the Mendeley logo and a user profile 'Madalena Carvalho'. The main content area features a 'Welcome to Mendeley' message, a search bar with the placeholder 'Search for articles...', and a 'Search' button. Below the search bar, there are links for 'Try: COVID-19 | Bioenergy | Obesity | Intrinsic Motivation'. A grey box contains the text 'Try the desktop app to manage your library' and a link 'Download Mendeley Reference Manager'. On the right side, there's a large image of a metallic, curved structure. At the bottom, there's a light blue footer bar with the text 'Mendeley Supports Responsible Sharing' and a link 'Learn how you can share'. Below this, there's a grid of links organized into four columns: Products (Reference Management, Datasets, Careers, Premium Packages), Support (Help Guides, Citation Guides, Support Center, Release Notes), About Us (About Us, Work at Mendeley, Contact Us, Accessibility, Blog, Advisor Community, Developers, Privacy Principles), and Downloads (Reference Manager, Web Importer, Citation Plug-in). A large red arrow points from the 'Downloads' column towards the 'Reference Manager' link.

ABSTRACT

Technological advancements and open educational resources (OER) together have opened up wider opportunities to access globally created educational resources by anyone across the globe. A paradigm shift has been witnessed in the format of learning resources, their access methods, and the medium of delivery of the knowledge content. The findings of this research reveal that the academic community of central universities (CU) of North India is well aware of open educational resources. E PG Path Shala is the most popular and most widely used, followed by NPTEL and YouTube. The majority of users use OERs as and when they require them. The purpose of using OERs for the majority of respondents is to prepare class notes. Most of the faculty and research scholars use OERs to improve their professional competency. The majority of respondents desired that the institutions should provide

Identifying Barriers to Open Educational Resources

Tel Amiel
UNICAMP, Brazil

Abstract

Remix is touted as one of the most important practices within the field of open educational resources (OER). But remixing is still not mainstream practice in education and the barriers and limitations to remix are not well known. In this article we discuss the design and development of a print and web-based booklet created to introduce the topic of OER to schoolteachers. The guide, the first of its kind available in Portuguese, was created through the remix and translation of existing resources available in English
