

Avaliar o Fator de Impacto (FI) de uma Publicação Científica

2025

Objetivo

Avaliar a relevância dos periódicos a partir do levantamento do número de citações por estes recebidos nos dois anos que sucedem o ano base.

Os dados relativos a um determinado ano são conhecidos apenas no ano seguinte.

Objetivo

Para se obter o FI de determinada publicação, divide-se o número de citações de artigos publicados por esse periódico nos últimos dois anos, pelo número total de artigos publicados nesse mesmo período.

Quanto mais citado for o periódico, maior será o seu FI.

Quartil :

Num conjunto de 100 publicações periódicas numa área temática, cada quartil é composto por um total de 25 periódicos e é apresentado da seguinte forma:

Q1: 1-25

Q2: 26-60

Q3: 61-75

Q4: 76-100

Os cálculos são efetuados anualmente para as publicações periódicas indexadas.

Improved Citescore
We have updated the CiteScore methodology to ensure a more robust, stable and comprehensive metric which provides an indication of research impact, earlier. The updated methodology will be applied to the calculation of CiteScore, as well as retroactively for all previous CiteScore years (ie. 2018, 2017, 2016...). The previous CiteScore values have been removed and are no longer available.
